

CORRECTION

For the article “Cilostazol reduces restenosis after endovascular therapy in patients with femoropopliteal lesions”, published in J Vasc Surg 2008;48:144-9, the authors have supplied the following additional corrections:

1. p 145, Table 1

Currently breakdown of male/female is listed as follows:

	<i>Cilostazol</i>	<i>Ticopidine</i>
Male	19	16
Female	44	48

These actually should be:

	<i>Cilostazol</i>	<i>Ticopidine</i>
Male	44	48
Female	19	16

2. p 148, expansion of CREST trial

Currently the expansion reads:

. . . the results obtained in the Carotid Revascularization Endarterectomy vs. Stent Trial (CREST)

This actually should be:

. . . the results obtained in coronary arteries in the Cilostazol for Restenosis Trial (CREST)
